Why should I join?

When you wear contact lenses it is important that your eyes are checked regularly to ensure they

remain healthy and you always have the optimum lens for your eyes. As a scheme member, you will receive regular checkups,

as well as any interim appointments as necessary, without any additional cost.

Our scheme allows you to make regular monthly payments including aftercare, lenses and solutions if necessary, as well as many other benefits including a 10% discount off all prescription spectacles (budget ranges not included)

Your monthly payment will be tailored to suit your needs and is dependent on the type of lenses you wear. This means that you will only be paying exactly what you need to pay to cover the goods and services you require.

By charging separately for our professional care and lenses, we are able to provide you with impartial advice about your vision needs, as well as the highest standard of clinical care, regardless of the products you require.

Contact lens options

The latest lens materials and designs allow you to see clearly and comfortably whilst maintaining the health of your eyes. It is our policy to provide you with a range of options to suit your lifestyle, prescription and budget.

Daily disposable soft lenses

There are a wide variety of disposable lens options available; all of which you wear once and then throw them away. They are suitable for the majority of prescriptions, including those with astigmatism. The great advantage with daily disposable lenses is that you will not require cleaning and disinfecting solutions.

Monthly disposable soft lenses

These are a popular and economical option. You wear your lenses during the day then take them out at night to clean and disinfect them. The latest silicone hydrogel materials allow longer wearing times.

Gas Permeable

These are manufactured from a rigid plastic material that allows oxygen to pass through them to keep your eyes healthy. They are suitable for all prescriptions and require less cleaning than soft lenses.

Lenses for astigmatism

A wide variety of contact lenses are now available to correct your vision if you have astigmatism, including daily and monthly disposable options.

Your contact lens care and payment plan

Your payment plan consists of:

Aftercare	£	per month
Contact lenses	£	per month
Solutions & care products	£	per month
Making a total of	£	per month*
Initial payment	£	

Usually this is made up of three times the monthly payment

* This payment includes VAT. VAT is not payable on the aftercare element of this scheme.
